April 22, 2020

Dear Speaker Pelosi, Majority Leader McCarthy, Chairman Pallone and Ranking Member Walden:

The undersigned education and related national associations write in strong support of the Emergency Educational Connections Act of 2020 (H.R. 6563), introduced by Rep. Meng. This bill would appropriate \$2 billion for an Emergency Connectivity Fund, administered through the Federal Communications Commission's (FCC) E-Rate program, for schools and libraries to support distance and remote learning for millions of students without home internet access for the duration of the COVID-19 emergency. With school buildings closed in every state in the country in response to this pandemic, and 36 states and 3 territories already announcing their schools will not reopen before summer break, time is of the essence to provide remote and distance learning support. An estimated 9 to 12 million students and some of their teachers currently lack home internet access and are unable to participate in their classes that have been moved online. We strongly urge you to take up and pass this bill as part of COVID-19 relief package IV.

The COVID-19 national emergency has struck K-12 education especially hard. Several recent national and local articles have shone a bright light on the existing 'homework gap' students have experienced across the country as schools have shuttered. This inequity among students who have internet at home and those who don't have kept several million students from participating in their education as it has moved online. Some schools have even decided to opt out of any online learning because of this inequity. A recent article in Mississippi Today highlights the technology challenges many rural students in that state face: "The closures present a unique set of challenges for rural schools, which serve 235,000 students in the state, according to national nonprofit Rural School and Community Trust. Online learning can be a challenge in some districts — statewide, almost one-fifth of Mississippi households do not have a computer and nearly one-third don't have broadband, the federal standard for internet speeds, according to Census Bureau data." Another recent article, from the Boston Globe, demonstrates that more urbanized states also face significant issues with unconnected students: "In Massachusetts, which has made strides in recent years to expand Internet access, 49,000 children under 18 still do not have service at home and more than 14,000 lack a computer at home, according to 2015 Census figures. The digital inequities remain so stark that education officials have moved away from the phrase 'online learning' and now call it 'remote learning.'"

Our organizations, which directly represent E-Rate program beneficiaries or are associated with those who do, believe that the E-Rate program is the best vehicle to disseminate funds quickly to schools and libraries for the purchase of Wi-Fi hotspots, modems, routers, and connected devices. The E-Rate program's successful equity-based 22-year history of keeping public and private schools

and public libraries connected to the internet demonstrates why it is best positioned to disseminate critical emergency funds to schools and libraries – with priority to those with the greatest need. Having committed over \$50 billion in support to schools and libraries since its founding in 1998, the E-Rate certainly can handle processing promptly and effectively the \$2 billion in homework gap funding called for by Rep. Meng’s legislation, ensuring an equitable distribution.

Furthermore, we believe the benefits of using the existing E-Rate program outweigh other options. We are confident the FCC will be able to deliver on the bill’s necessary expedited timeline, as well. As it has shown in its responses to other disasters, including hurricanes, the FCC can quickly move E-Rate support to affected schools and libraries by making the necessary tailored adjustments to the program needed during this emergency.

Finally, we thank Rep. Meng for her leadership on this issue and for introducing the Emergency Educational Connections Act of 2020. We believe that the challenge facing millions of students across the country that lack home internet and access demands and requires a dedicated funding source, which Rep. Meng’s Emergency Connectivity Fund would provide. Without it, millions of students will be left behind.

Based on the foregoing, we urge you to ensure this legislation is included in the next COVID funding package passed by Congress.

Sincerely,

April 29, 2020

Dear Majority Leader McConnell, Pelosi, Minority Leader Schumer, Chairman Wicker and Ranking Member Cantwell:

The undersigned education and related national associations write in strong support of the Emergency Educational Connections Act of 2020, to be introduced by Senators Markey, Van Hollen, Bennet, and Hassan. This bill would appropriate \$4 billion for an Emergency Connectivity Fund, administered through the Federal Communications Commission's (FCC) E-Rate program, for schools and libraries to support distance and remote learning for millions of students without home internet access exacerbated by the COVID-19 emergency. This bill comes at a critical juncture: school buildings have closed in every state in the country in response to this pandemic; 43 states, 4 territories and the District of Columbia have already announced that their schools will not reopen this school year; and some states and districts are already considering expanding summer school options and planning for the possibility of interruptions to classroom teaching and learning next academic year. With an estimated 9 to 12 million students and some of their teachers currently lacking home internet access and unable to participate in online classes now and in the future, there is great need for Senator Markey and his colleagues' legislation. We strongly urge you to take up and pass this bill as part of COVID-19 relief package IV.

The COVID-19 national emergency has struck K-12 education especially hard. Several recent national and local articles have shone a bright light on the existing 'homework gap' students have experienced across the country as schools have shuttered. This inequity, among students who have Internet at home and those who don't, has kept several million students from participating in their education as it has moved online. Some schools have even decided to opt out of any online learning because of this inequity. A recent article in Mississippi Today highlights the technology challenges many rural students in that state face: "The closures present a unique set of challenges for rural schools, which serve 235,000 students in the state, according to national nonprofit Rural School and Community Trust. Online learning can be a challenge in some districts — statewide, almost one-fifth of Mississippi households do not have a computer and nearly one-third don't have broadband, the federal standard for internet speeds, according to Census Bureau data." Another recent article, from the Boston Globe, demonstrates that more urbanized states also face significant issues with unconnected students: "In Massachusetts, which has made strides in recent years to expand Internet access, 49,000 children under 18 still do not have service at home and more than 14,000 lack a computer at home, according to 2015 Census figures. The digital inequities remain so stark that education officials have moved away from the phrase 'online learning' and now call it 'remote learning.'"

Our organizations, which directly represent E-Rate program beneficiaries or are associated with those who do, believe that the E-Rate program is the best vehicle to disseminate funds quickly to schools and libraries for the purchase of Wi-Fi hotspots, modems, routers, connected devices and advanced information and technology services. The E-Rate program's successful equity-based 22-year history of keeping public and private schools and public libraries connected to the internet demonstrates why it is best positioned to disseminate critical emergency funds to schools and libraries – with priority to those with the greatest need. Having committed over \$50 billion in support to schools and libraries since its founding in 1998, the E-Rate certainly can handle processing promptly and effectively the \$4 billion in homework gap funding called for by Senator Markey's legislation, ensuring an equitable distribution.

Furthermore, we believe the benefits of using the existing E-Rate program outweigh other options. We are confident the FCC will be able to deliver on the bill's necessary expedited timeline, as well. As it has shown in its responses to other disasters, including hurricanes, the FCC can quickly move E-Rate support to affected schools and libraries, making the necessary tailored adjustments to the program needed during this emergency.

Finally, we thank Senator Markey, an original author of the E-Rate program, for his long-term leadership on this issue and for his intent to introduce the Emergency Educational Connections Act of 2020. We believe that the challenge facing millions of students across the country that lack home Internet access demands and requires a dedicated funding source, which Senator Markey's Emergency Connectivity Fund would provide. Without it, millions of students will be left behind.

Based on the foregoing, we urge you to ensure this this legislation is included in the next COVID funding package passed by Congress.
